QUALIFIED TALENT

Companies have a robust workforce within close proximity because Tucson attracts and develops strong talent through its institutions of higher learning. Leading the way is the [University of Arizona](#) (which includes one of the nation's top-ranked business schools, Eller College of Management and McGuire Center for Entrepreneurship) with a total student enrollment count of 51,134 annually plus [Pima Community College's](#) 5,000 graduate count, creating a skilled workforce pipeline. The higher education institutions work directly with employers to engage students providing internships to test-drive talent. Partnering with industry, companies are active in training the workforce to meet their needs both now and into the future. Additionally, a large and diverse veteran workforce calls Tucson home.

Military personnel from [Davis-Monthan AFB](#) and [Fort Huachuca](#) enjoy Tucson and often transition into the workforce after their time in service. Several veteran programs are in place for military to have the opportunity to work with an organization for six months while the military pays their full salary and benefits. Arizona SkillBridge program connects service members with industry partners for specific career skills training. Tucson's diverse talent pool is largely bilingual and complementary to a wide range of industries. There is a significant number of millennial rising leaders being developed by programs including: Tucson Young Professionals, Greater Tucson Leadership, and Executive Leadership Council. Industry clusters and tech associations thrive here including: Arizona Tech Council, AZ Optics Valley, and AMIGOS Arizona Mining Industry.

UA Tech Park

COMMUNITY & CULTURE

The UA Tech Park is one of the nation's premier research parks – a dynamic community where emerging companies and technology giants work alongside one another in a fast-paced environment..

Workplace Environment

The UA Tech Park was recognized as *Tucson's Most Innovative Workplace* and the *Best Workplace Culture* based on votes from the Arizona Daily Star Reader's Choice Awards. Employees from every company at the park, which are called Tech Cats, connect with each other establishing a broader sense of community.

Connections

Common spaces are purposefully built to bring people together. Employees connect during the workday to network, share business ideas and also unwind through fitness classes, pop-up parties, and celebrations like Homecoming at the UA Tech Park.

Beyond the Bricks

The Park's offerings extend beyond brick-and-mortar boundaries to providing customized business development support. Businesses that are located at the UA Tech Park are immediately plugged into the resources of the University of Arizona, a Tier One research university. This status indicates that the institution engages in the highest levels of research activity therefore businesses benefit from a collection of experts and a robust talent pipeline.

REGIONAL EMPLOYMENT HUB

Data sources from 2019 Report

Businesses here create an economic powerhouse and major employment hub for the region.

SPACE: LABORATORIES

The UA Tech Park has robust laboratory offerings including BSL-2 facilities, wet chemistry benches with fume hoods, dry lab facilities and a prototyping center. Growing businesses have access to a lab manager, a range of equipment and cold storage providing companies the opportunity to research, develop prototypes and demonstrate their products. Science-based business opportunities span from “renting a bench” to leasing a private lab. Our laboratory is GLP-qualified (Good Lab Practices) which ensures that lab standards and equipment are of the highest caliber.

Lab Equipment:

Specialty Equipment	Standard Lab Equipment
UV-Vis Spectrophotometer	Workbench Space with Chemical Fume Hood and Environmental Exhaust
Bio-Safety Cabinet	Data Lines
Incubator	Lab Refrigerator and Freezer
Cell Culture Lab	Compressed Air
Microscope	
Nanopure System	Safety Equipment
Tabletop Autoclave	Lab Manager
Top Loading Balance	Lone Worker Personal Alert System
Forced Air Oven	Restricted Access to Labs
Analytical Balance	Centralized Chemical Storage
Thermocycler	First Aid Station
PH and Conductivity Meter	Spill Kit
Centrifuge	Emergency Shower and Eyewash Stations
Data Loggers	On-Site EMS Personnel
Hot/Stir Plate	
Ultra -Low Temperature Freezer	
CO2 Incubator	

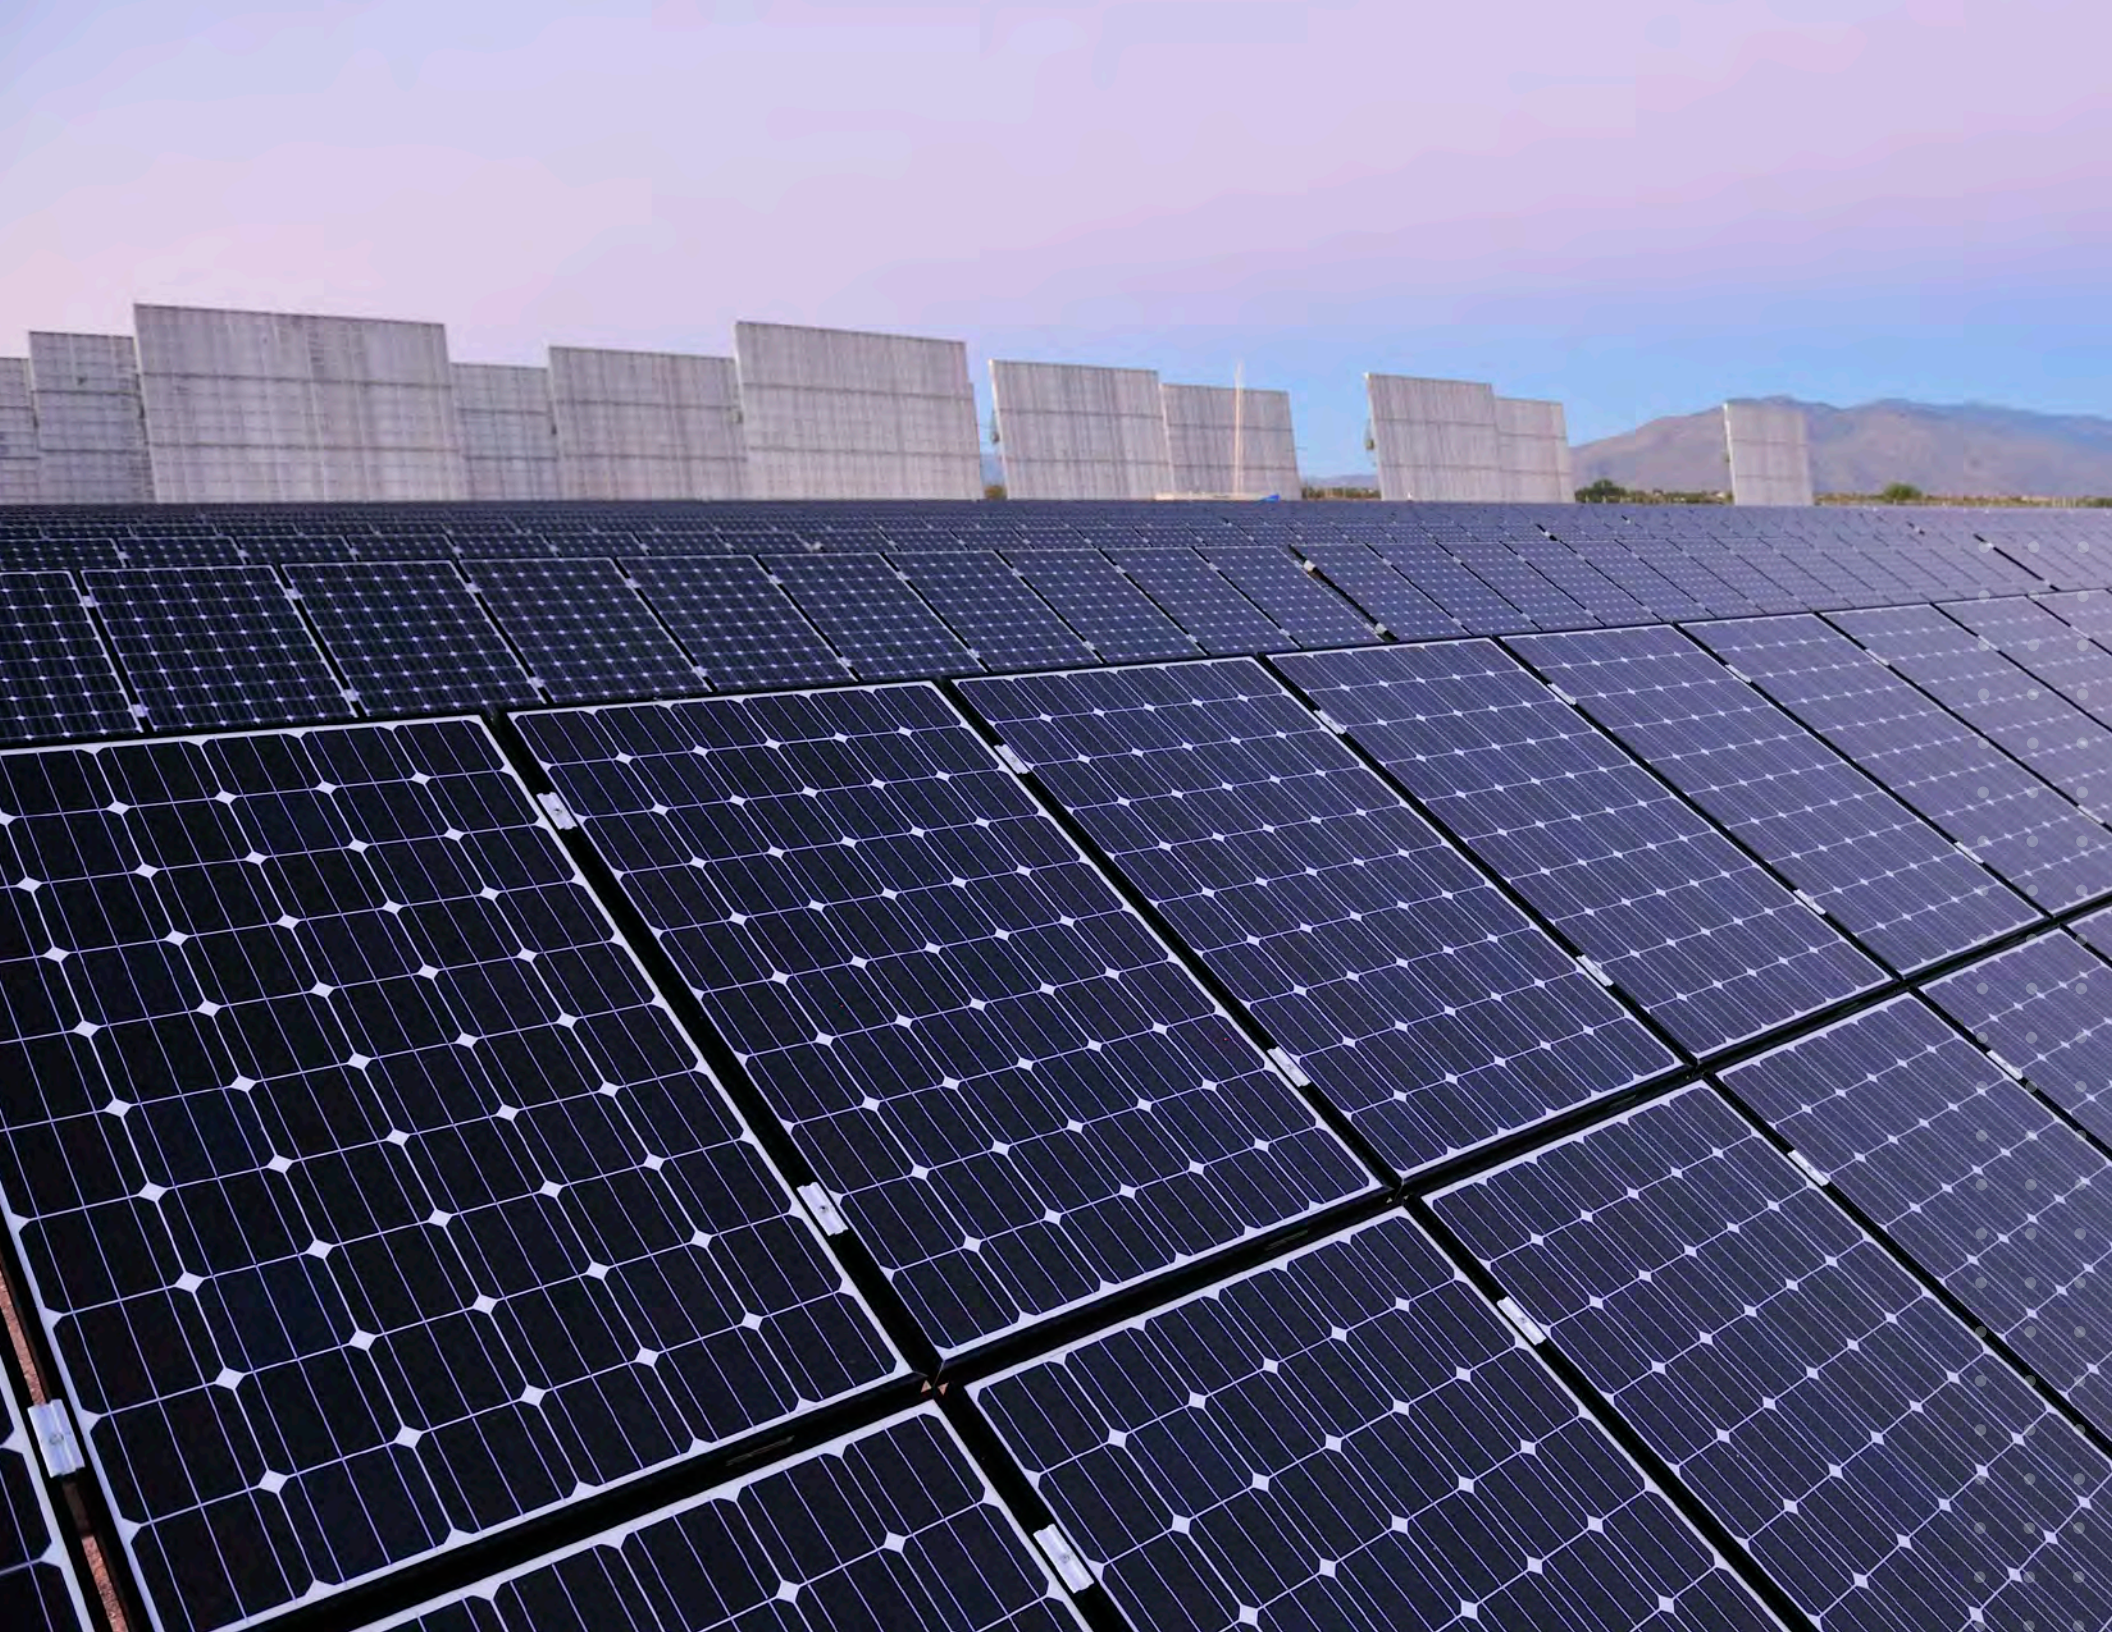

UA Tech Park

SPACE: CLASS A OFFICE

Class A office space is move-in ready with furnished office space, open floor plans, robust telecommunication infrastructure and common outdoor gathering areas.

UA Tech Park

SOLAR ZONE

Tech Park Arizona leveraged its assets to develop an innovative renewable energy project with its industry partner, Tucson Electric Power (TEP).

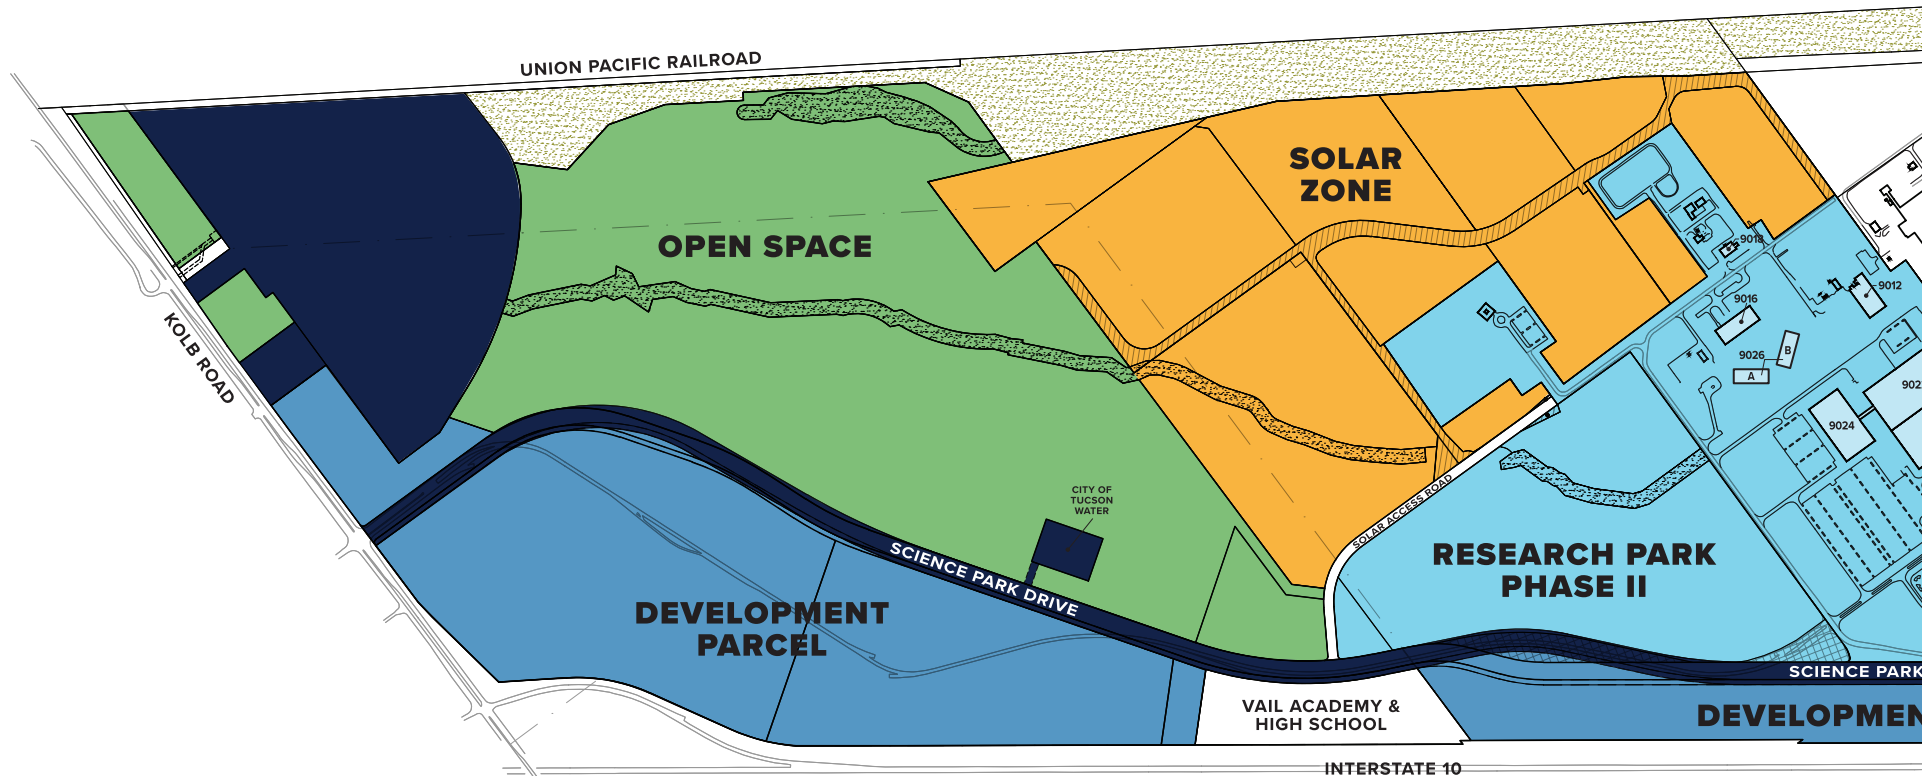

The Solar Zone at the UA Tech Park is one of the largest multi-technology grid-level solar demonstration site in the United States. Seven companies with eight projects test and demonstrate a variety of renewable technologies and systems. and demonstrate a variety of solar technologies and systems. The 223-acre site is designed to generate 25 megawatts of power, which is over twice the daily electrical consumption of the Tech Park and enough to power the homes of more than 4,600 TEP residential consumers for a year.

The sun shines eighty-five percent of the year in Tucson, making the Solar Zone at UA Tech Park the perfect place for testing, evaluation, and demonstration of solar technologies. New collaboration opportunities are available through Solar Zone Phase Two.

BIRD'S EYE VIEW

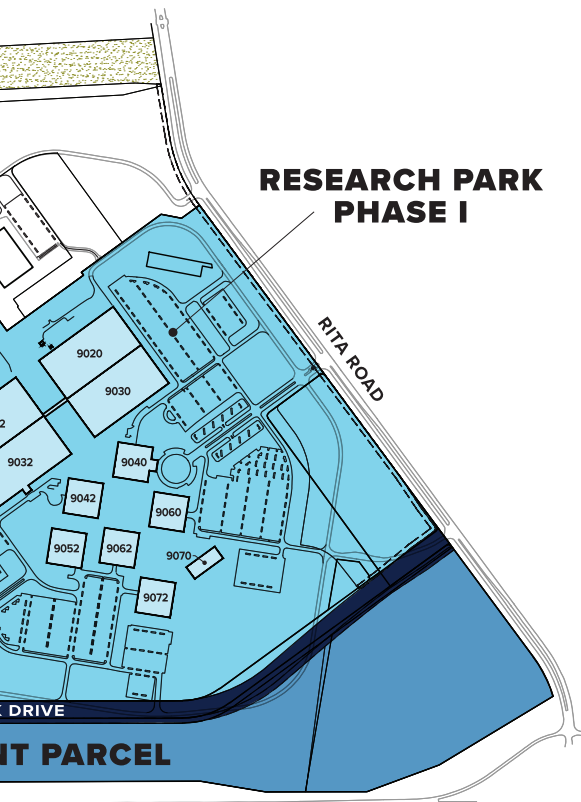

UA Tech Park Development Map

The UA Tech Park is a master-planned, mixed-use development. Located in one of Arizona’s fast-growing suburban settings on Tucson’s southeast side, the park’s spacious campus encompasses 1,267 acres and has 2 million square feet of developed space. The park is situated on a prime parcel located in southeast Pima County, with good interstate access, high visibility, and ample room for development. UA Tech Park has the capacity to provide build to suit options for prospective tenants.

UA Tech Park

AT THE BRIDGES

The UA Tech Park at The Bridges is a 65-acre community of innovation within a larger 350-acre multi-use development that includes residential and retail development in central Tucson. It is prime real estate for public, private and academic users located just minutes away from downtown Tucson, the Tucson International Airport, and the University of Arizona main campus.

Located in an Opportunity Zone, the long-term vision encompasses approximately 1.2 million square feet of developed office and laboratory space that could support 5,000 knowledge workers. The UA Tech Park at The Bridges provides the ideal platform for technology advancements and business growth through university-industry collaborations. By bringing together all the aspects of a turn-key ready business operation and interconnecting the power of the University of Arizona, the traditional business office space is transformed into a purpose-built environment that inspires innovation.

The Refinery, a brand new four-story, 120,000 sq ft office building was developed by The Boyer Company in close collaboration with Tech Parks Arizona. The multi-tenant building serves as the ideal place for businesses looking to co-locate with the University of Arizona expertise. It provides the ideal platform for companies to recruit the best and brightest minds and establish joint-research projects because of close proximity to the University of Arizona.

Adjacent to The Refinery is SpringHill Suites by Marriott. The strategically located 126-all-suite hotel offers various meeting/conference areas, free wifi, and food/beverage service.

The UA Tech Park at The Bridges is also home to the UArizona Office of Research, Innovation and Impact Mission Integration Lab (MIL). The MIL accommodates balloon-borne astronomy, filling an important niche between ground-based observatories and space telescopes. Modern balloon-borne observatories offer space-like views of the universe in missions that require a fraction of the time and cost of a full space mission and serve as a platform to test cutting-edge orbital mission technologies.

Coming soon to the park is a new, state-of-the-art facility for the Arizona Public Media operations. The new media studio will provide upgraded production and broadcast technology, improved community engagement and new opportunities for increased original local content.

THE UNIVERSITY OF ARIZONA
**CENTER FOR
INNOVATION**
at Oro Valley

1800

University of Arizona

CENTER FOR INNOVATION

The University of Arizona Center for Innovation (UACI) is a leader in the entrepreneurial ecosystem and has long served the region's strong and vibrant community of innovators for over 20 years.

As a startup incubator network with locations across Southern Arizona, UACI supports science and technology companies at any stage of development coming from the University of Arizona, the general Tucson community, and internationally.

UACI provides access to people, programming and places that help entrepreneurs take their companies from idea to market. Startups go through a 28-point structured roadmap that takes them through a continuum of education provided by mentors, subject matter experts and community collaborators. UACI also provides access to service providers, industry cluster groups, interns and connections to potential customers and strategic partners. Entrepreneurs utilize various physical spaces that include offices, wet and dry labs, meeting rooms, a prototyping center, collaboration areas and the infrastructure to support these spaces. Over the last 20 years, UACI startups have attracted \$105.8M in capital to the region.

UACI collaborates with many national and international organizations to enhance programs and startup support. As one of six power connectors for the U.S. Department of Energy (DOE), UACI connects entrepreneurs to programs like the American Made Solar challenge to fund projects and technology advancing solar power capabilities. Businesses seeking international expansion can directly locate to Southern Arizona

knowing that UACI will provide the necessary resources and programming needed for new market entry in the US. UACI is recognized by the International Business Innovation Association (InBIA) as a Soft-Landing designee, a prestigious title with only a dozen designees worldwide. UACI outposts not only provide a physical setting, but also offer businesses a unique connection to the University of Arizona.

THE UNIVERSITY OF ARIZONA

Tech Parks Arizona is deeply aligned with the research, mission and goals of the University of Arizona, a world-class Tier One research and Top 20 public university, as ranked by the National Science Foundation. Companies can leverage the University of Arizona's knowledge and resources to provide innovative solutions to today's global challenges.

The University of Arizona academic community is dreaming big and creating incredible innovations to make a better world.

UArizona is a research leader in fields such as:

- » Water resource management
- » Space and defense
- » Mining technology
- » Biotechnology
- » Optical sciences

The University of Arizona
