Tucson International Airport (TUS) is known for its friendly customer service and convenient travel experience. Passengers can fly to/from Tucson International Airport on flights serving 20 destination airports on Alaska, Allegiant, American, Avelo, Delta, Frontier, Sun Country, Southwest and United airlines. Navigating the terminal at Tucson International Airport is about as easy and low stress as it gets.
Tech Parks Arizona creates the place, environment, and interactive ground that generates, attracts and retains technology companies and talent in alignment with the research, mission, and goals of the University of Arizona (UA). Tech Parks Arizona manages and operates the UA Tech Park at Rita Road, UA Tech Park at The Bridges and the University of Arizona (UA) Center for Innovation with the highest priority to recruit and locate companies seeking connections to the UA.
Strategically located, but without megacity congestion and regulation, Tech Parks’ position in Arizona provides access to major markets including California, Texas, the Mountain West, and the markets and manufacturing capabilities of Mexico. Tucson’s geographic location serves as a vantage point for many businesses as it provides access to nearly seventy million customers in the United States and Mexico within a 1,000-mile radius.

Tucson is quickly climbing the rankings for its diverse workforce and countless opportunities this geographic region offers. Tucson ranked in the Top 20 for “America’s Best Cities” in 2021 by Resonance Consultancy based on the city’s natural environment, key infrastructure, innovation, culture, diversity, education, income, housing prices and up-and-coming economy. CBRE identified Tucson in the Top 25 for “Tech Talent Markets 2021” due to its strong labor market and growth opportunities for companies. Low labor costs and a high concentration of skilled workers have propelled Tucson’s tech talent rankings.

The crown jewel of Tucson is the University of Arizona, a Tier One research university that produces a robust talent pipeline. The world-class research and innovation spurred from the University is a magnet for businesses and has ignited a budding startup scene.

Tech Parks Arizona has established itself at the intersection of Innovation and University to advance business. Our purpose-built environment is customized to support businesses of all sizes and facilitate university-industry interaction. Tech Parks Arizona has reimagined the traditional workspace through the perspective of the user and designed it to be very flexible with the ability to rapidly evolve based on users’ needs.

Tucson is recognized for its sense of community and culture which is as diverse and rich as its culinary distinction. The region has a strong sense of pride and is very interconnected. If you seek a destination that feels like a community, then Tech Parks Arizona is where your company will thrive.

Learn more about the benefits businesses receive by collaborating with Tech Parks Arizona and the University of Arizona.

Population & Cost of Living

DOING BUSINESS HERE
Companies have a robust workforce within close proximity because Tucson attracts and develops strong talent through its institutions of higher learning. Leading the way is the University of Arizona (which includes one of the nation’s top-ranked business schools, Eller College of Management and McGuire Center for Entrepreneurship) with a total student enrollment count of 46,932 annually plus Pima Community College’s 5,000 graduate count, creating a skilled workforce pipeline. The higher education institutions work directly with employers to engage students providing internships to test-drive talent. Partnering with industry, companies are active in training the workforce to meet their needs both now and into the future. Additionally, a large and diverse veteran workforce calls Tucson home.

Military personnel from Davis-Monthan AFB and Fort Huachuca enjoy Tucson and often transition into the workforce after their time in service. Several veteran programs are in place for military to have the opportunity to work with an organization for six months while the military pays their full salary and benefits. Arizona SkillBridge program connects service members with industry partners for specific career skills training. Tucson’s diverse talent pool is largely bilingual and complementary to a wide range of industries. There is a significant number of millennial rising leaders being developed by programs including: Tucson Young Professionals, Greater Tucson Leadership, and Executive Leadership Council. Industry clusters and tech associations thrive here including: Arizona Tech Council, AZ Optics Valley, and AMIGOS Arizona Mining Industry.
Technology’s Best Address

UA TECH PARK

With over 25 years of success, UA Tech Park can provide turn-key ready business operations that represent industry best practices. Companies that locate at the park are connected to a world-class team that is invested in their success. The dedicated management team’s support spans the spectrum from tenant and employee ombudsman to facilities and maintenance coordination.

Tech Parks Arizona Technology’s Best Address
The UA Tech Park was recognized as Tucson’s Most Innovative Workplace and the Best Workplace Culture based on votes from the Arizona Daily Star Reader’s Choice Awards. Employees from every company at the Park, which are called Tech Cats, connect with each other establishing a broader sense of community.

Connections
Common spaces are purposefully built to bring people together. Employees connect during the workday to network, share business ideas and also unwind through fitness classes, pop-up parties, and annual celebrations like Homecoming at the UA Tech Park.

Beyond the Bricks
The Park’s offerings extend beyond bricks and mortar boundaries to providing customized business development support. Business that locate at the UA Tech Park are immediately plugged into the resources of the University of Arizona, a Research 1 university. This status indicates that the institution engages in the highest levels of research activity therefore businesses benefit from a collection of experts and a robust talent pipeline.
The UA Tech Park has robust laboratory offerings including BSL-2 facilities, wet chemistry benches with fume hoods, dry lab facilities and a prototyping center. Growing businesses have access to a lab manager and a range of equipment providing companies the opportunity to research, develop prototypes and demonstrate their products. Science-based business opportunities span from “renting a bench” to leasing a private lab. Our laboratory is GLP-qualified (Good Lab Practices) which ensures that lab standards and equipment are of the highest caliber.
UA Tech Park buildings offer a range of Class A office space that can be used for back office activities to engineering and design processes. Class A office space is move-in ready with thousands of square feet of furnished office space, open floor plans, robust telecommunication infrastructure and common outdoor gathering areas.

This second floor suite located in building 9040 is perfect for fast growing technology companies. This building is the ideal location for office and research & development. UA Tech Parks was voted best workplace, awarded most innovative and best culture in the workplace.
The University of Arizona leveraged its assets to develop an innovative renewable energy project with its industry partner, Tucson Electric Power (TEP).

The Solar Zone at the UA Tech Park is one of the largest multi-technology grid-level solar demonstration site in the United States. Eight companies with nine projects test and demonstrate a variety of solar technologies and systems, and demonstrate a variety of solar technologies and systems. The 223-acre site is designed to generate 25 megawatts of power, which is over twice the daily electrical consumption of the Tech Park and enough to power the homes of more than 4,600 TEP residential consumers for a year.

The sun shines eighty-five percent of the year in Tucson, making the Solar Zone at UA Tech Park the perfect place for testing, evaluation, and demonstration of solar technologies. New collaboration opportunities are available through Solar Zone Phase Two.
The UA Tech Park is a master-planned, mixed-use development. Located in one of Arizona’s fast-growing suburban settings on Tucson’s southeast side, the Park’s spacious campus encompasses 1,267 acres and has 2 million square feet of developed space. The park is situated on a prime parcel located in southeast Pima County, with good interstate access, high visibility, and ample room for development. UA Tech Park has the capacity to provide build to suit options for prospective tenants.
UA Tech Park at The Bridges

The UA Tech Park at The Bridges is a 65-acre community of innovation within a larger 350-acre multi-use development that includes residential and retail development in central Tucson. It is prime real estate for public, private and academic users located just minutes away from downtown Tucson, Tucson International Airport, and the University of Arizona main campus.

Located in an Opportunity Zone, the long-term vision encompasses approximately 1.2 million square feet of developed office and laboratory space that could support 5,000 knowledge workers. The UA Tech Park at The Bridges provides the ideal platform for technology advancements and business growth through university-industry collaborations. By bringing together all the aspects of a turn-key ready business operation and interconnecting the power of the University of Arizona, the traditional business office space is transformed into a purpose-built environment that inspires innovation.

The Refinery building will serve as the tech commercialization hub for the University including the new offices for Tech Launch Arizona, an incubator outpost and programming through the University of Arizona Center for Innovation plus innovation space for students and faculty. The University of Arizona Applied Research Corporation (UAARC) will also provide a controlled-access facility.
The University of Arizona Center for Innovation (UACI) is a leader in the entrepreneurial ecosystem and has long served the region’s strong and vibrant community of innovators.

As a startup incubator network with locations across the Southern Arizona region, UACI supports science and technology companies at any stage of development coming from the University of Arizona, the general Tucson community, and internationally.

This is done by providing access to people, programming and places that help entrepreneurs take their companies from idea to market. Startups go through a 27-point structured roadmap that takes them through a continuum of education provided by mentors, advisors and community collaborators. UACI also provides access to service providers, industry cluster groups, interns and connections to potential customers and strategic partners. Entrepreneurs utilize various physical spaces that include offices, wet and dry labs, meeting rooms, a prototyping center, collaboration areas and the infrastructure to support these spaces.

Businesses seeking international expansion can directly locate to Southern Arizona knowing that UACI will provide the necessary resources and programming needed for new market entry in the US. UACI is recognized as a Soft-Landing designee from the International Business Innovation Association (InBIA). This designation is very prestigious with only a handful of designees worldwide. With the official certification from InBIA, international companies can be assured that these services meet or exceed best practices. The incubator outposts not only provide a physical setting, but also offer businesses a unique connection to the University of Arizona.
Tech Parks Arizona is deeply aligned with the research, mission and goals of the University of Arizona, a world-class Tier One research university. Companies can leverage the University of Arizona’s knowledge and resources to provide innovative solutions to today’s global challenges.

The University of Arizona academic community is dreaming big and creating incredible innovations to make a better world.

Listed in the top 100 of the 2021 U.S. News & World Report’s Best Colleges list, UArizona is a research leader in fields such as:

- Water resource management
- Space and defense
- Mining technology
- Biotechnology
- Optical sciences
The University of Arizona ranks among the top 20 U.S. public research institutions. The NSF analyzed more than 920 institutions nationwide, ranking UArizona in the top 4 percent.

The second largest Hispanic-Serving Institution in the nation.

UArizona is number 1 in astronomy and astrophysics, according to data from the National Science Foundation.

UArizona is number 5 in NASA Funding Among all Universities

Research Dollars: More than $734 million in total R&D activity.

Employers who say UA grads exceed their peers. 89%.

89% Employers who say UA graduates exceed their peers.
